

Our Beliefs...

We strongly believe every Student should graduate from high school prepared for college or fulfilling businesses & careers in industries where they are put in a position to succeed especially in the Media Arts, and Film field where the only limit is their imagination.

We strongly believe and recognize that in order to participate fully in the new media world, Students need to be able to access, analyze, evaluate and communicate messages in a wide variety of forms. *Every Youth and Teen, need to be introduced to what some call the New media art which refers to artworks created with new media technologies, including digital art, computer graphics, computer animation, virtual art, interactive art, Film and video production art.*

BUSHELLMEDIA ARTS

"Helping Your Child See The World
Through One Lens At A Time"

Video Production

Our Program is a project-based visual arts program, which will provide students with the technical instruction and practical experiences for aspiring video and filmmakers, in the production of film, video, and other media projects for business and entertainment.

Students will learn the basic principles of story development, screenplay writing, and storyboarding. In addition to instructions in the production stage, including set up and operation of the camera, sound, and lighting equipment. Furthermore, Students will learn introductory skills in cutting-edge software applications for design and video post-production.

Our Curriculum

Students are given the opportunity to learn all that encompasses, including the BTS world, of video production. This program has a experiential lesson plan, and mapping that has been developed and designed by professional educators, which are based on the common core standards and extended to include extensive opportunities for artistic expression and active community engagement.
